

BATTERY SERVICES:

CUSTOM BATTERY DESIGN and ASSEMBLY

At Interstate All Battery Center, we can provide every portable power solution you could possibly require. Can't find a battery to fit your specific power need? Let us create a custom battery to your exact specifications, no matter how large or complex the job. Custom battery pack design and engineering assistance is also available. We can even provide custom packaging.

WE KNOW. ASK US.

With the vast selection of battery types and chemistries for today's power-hungry devices, you're bound to have questions. Our staff will help you choose the right battery type for your power needs and will explain the do's and don'ts, along with proper maintenance tips, to help you get maximum power and longer life from your batteries.

To become a qualified portable power specialist, our technicians must pass an intensive five-star certification program designed to make them experts in every battery chemistry, configuration, capacity and use. Through ongoing training, they stay current with the latest technology and trends in testing, analyzing, conditioning, assembling and rebuilding your batteries.

EVERY BATTERY FOR EVERY NEED®

BATTERY SERVICES:

ANALYZING, CONDITIONING and REBUILDING

SERVICE THAT SAVES

Looking for an alternative to replacing the costly battery packs in your power tools, razor, hand vacuum and other devices? No matter the device, battery chemistry, capacity or configuration, Interstate All Battery Center technicians can save you money!

Our technicians can provide complete analysis services to determine the condition and capacity of your battery. Many times, it is more cost-efficient to rebuild the battery than to buy a new replacement. In addition to replacing damaged or worn batteries with new ones, our rebuilding services include testing, cleaning, reassembling and resealing the battery and other components so your device runs like new. Our rebuilt batteries are guaranteed to have capacity equal to or higher than the original equipment manufacturer battery and come with a one-year warranty.

Another alternative to purchasing a new battery is battery conditioning. Interstate All Battery Center offers conditioning/analyzing services for rechargeable batteries to remove “memory effect” that occurs over time, and reduces the power capacity. Conditioning can extend battery life by restoring the battery back or close to its original capacity rating.

AT EVERY ALL BATTERY CENTER, WE HAVE IT or WE FIND IT or WE BUILD IT. GUARANTEED.
